

Switch Hampshire Scheme: Last week of Registration!

With winter upon us and with energy bills rising, many residents will find it hard to heat their homes over the coming months. Research shows a direct link between poorly heated houses and an increase in ill health. In addition to other measures such as insulation and draught proofing, securing a better deal on energy bills and taking the hassle out of switching can help residents keep their houses warm.

The Switch Hampshire scheme is backed by Hampshire County Council and your local Council and aims to help residents save money on their energy bills and take the hassle out of switching.

Benefits of the scheme include:

- It's a safe council-backed scheme
- Registration is simple, free and no obligation – either through the website at www.hants.gov.uk/switch or on 01962 846828
- It can show residents whether they're currently on a good deal or if they could save if they switched
- Takes the hassle out of switching
- Gives a fixed price contract for at least a year
- The scheme covers gas, electricity (including Economy 7) and pre-payment meters.

Promoting the scheme to residents who could benefit the most from savings is really important; therefore we would be grateful if you could publicise it as widely as possible to your networks and clients before registration closes on 17th February.

Please feel free to contact us if you have any questions or would like to discuss the scheme.

Many thanks for your assistance.

Yours faithfully

Alan Whitney
